

Celebrations

MiraMon 20 years

15 December 2014

“Closer to the geoinformation 1994–2014”

This 2014, MiraMon, the GIS and remote sensing software developed by the CREAf and the UAB, celebrates the twentieth anniversary of its creation. Twenty years of life, of maps, of code, of courses, of cartography, of remote sensing imagery, etc. During these 20 years, thousands of users in dozens of countries have trusted and used the MiraMon in their professional and personal activities, generating ideas, products and results of great interest and importance in various fields. Currently the MiraMon continues to progress in the fields of science, education and environmental management in which it originated, as well as in metadata, standardization and advanced computational methods, in order to give access to the best geoinformation for research, management and knowledge of the territory.

Technical Seminar

Sala d'actes of the ICGC (Parc de Montjuïc, BCN)

09.30	Opening Mr. Jaume Miranda (ICGC) Mr. Enric Rodellas (ACTIG)
